

Frequently Asked Questions

Customer Support Knowledge Base

General and Product Questions

- Q1.** What does Contoso Devices sell? A. Contoso Devices sells smart consumer electronic devices and accessories.
- Q2.** How do I start using my new device? A. Follow the product manual, complete initial setup, and charge the device for approximately 2 hours before first use.
- Q3.** Which charger should I use? A. Use only the supplied charger.
- Q4.** Can I use the device near water? A. No. Devices should be kept away from water.
- Q5.** Can I leave the device in extreme heat? A. No. Keep the device away from extreme heat.
- Q6.** How do I clean the device? A. Follow the maintenance instructions in the product manual and use appropriate cleaning materials; avoid exposing the device to water.
- Q7.** My device will not turn on. What should I do? A. Confirm the battery is charged, check the supplied charger and connection, and follow the troubleshooting guide.
- Q8.** How long should I charge the device before first use? A. Approximately 2 hours.
- Q9.** Bluetooth will not connect. What should I check? A. Confirm Bluetooth is enabled, restart the relevant devices, and retry pairing using the product instructions.
- Q10.** Wi-Fi keeps disconnecting. What should I do? A. Check network availability, restart the network equipment if appropriate, confirm the device is within range, and retry the connection.
- Q11.** The mobile application is not responding. What should I do? A. Restart the application, verify connectivity, and check for available application or firmware updates.
- Q12.** The voice assistant is not responding. What should I check? A. Verify internet connectivity, update device firmware if an update is available, and restart the device.

Accounts and Support

- Q13.** What are customer support hours? A. Monday through Friday, 9:00 AM–6:00 PM IST. Limited weekend support is available through email.
- Q14.** How can I contact support? A. Use the available Contoso Devices customer-support channels and provide a clear description of your issue.
- Q15.** I forgot my password. What should I do? A. Use the account password-reset process and follow the verification instructions.
- Q16.** Should I give support my password? A. No. Never share passwords or authentication codes.
- Q17.** My account is locked. What can I do? A. Use account recovery and contact support if the account remains inaccessible.
- Q18.** Can I change my email address? A. Use the authenticated account-management process; additional verification may be required.

Q19. Can I delete my account? A. Follow the account-deletion process and review active orders or support cases before deletion.

Q20. Someone may have accessed my account. What should I do? A. Secure the account through official recovery procedures and contact support.

Orders, Shipping, Returns and Refunds

Q21. How long do I have to return a product? A. Products may be returned within 30 days of delivery, subject to the return policy.

Q22. Can I return a product I received yesterday? A. A product delivered yesterday is within the 30-day return period, but eligibility also depends on the condition and reason for return.

Q23. My product arrived physically damaged. What should I do? A. Report the damage promptly and follow the return or replacement process. Physical damage is distinct from a manufacturing defect.

Q24. Does a manufacturing defect qualify for warranty? A. Manufacturing defects are covered by the applicable warranty.

Q25. Is accidental damage covered by warranty? A. No. Accidental drops and physical damage are excluded from warranty coverage.

Q26. Is water damage covered? A. No. Water damage is excluded from warranty coverage.

Q27. Are unauthorized repairs covered? A. No. Unauthorized repairs are excluded from warranty coverage.

Q28. How long is the electronics warranty? A. Electronics are covered for 12 months.

Q29. How long is the accessories warranty? A. Accessories are covered for 6 months.

Q30. What does the warranty cover? A. Manufacturing defects, hardware malfunction, and component failure.

Q31. Can I request a replacement? A. Replacement availability depends on the applicable return, warranty, inspection, and support process.

Q32. Can I request a refund? A. Eligible returns can proceed through the refund process described in the returns and refunds policy.

Q33. Can I exchange a faulty product? A. Contact support and describe the fault so the appropriate return, replacement, or warranty process can be determined.

Q34. What happens if an item is missing from my shipment? A. Contact support with the order details so the shipment can be reviewed.

Q35. What if tracking says delivered but I did not receive the package? A. Verify the delivery location and contact support if the package cannot be located.

Q36. What if my shipping address is wrong? A. Contact support promptly; changes may depend on the shipment's processing status.

Q37. What if my package is delayed? A. Check tracking information and contact support if the delay exceeds the expected delivery window.

Q38. Can I return a used product? A. Return eligibility depends on the applicable return conditions and product condition.

Q39. What happens if accessories are missing from a returned product? A. Report the missing items because they may affect inspection and eligibility.

Q40. How long does a refund take? A. Refund processing depends on return inspection and the payment process; follow the applicable return instructions.

More Troubleshooting Questions

Q41. My device overheats. What should I do? A. Turn off the device, allow it to cool, keep it away from extreme heat, and contact support if overheating continues.

Q42. My device is slow. What should I do? A. Restart it, check for firmware or software updates, and follow the troubleshooting guide.

Q43. How do I reset the device? A. Follow the reset procedure in the product manual for the applicable device.

Q44. What if a firmware update fails? A. Verify connectivity and power, retry the update according to the product instructions, and contact support if the problem persists.

Q45. Can I use a third-party charger? A. No. Use only the supplied charger.

Q46. What should I do if troubleshooting does not work? A. Contact customer support with the problem description and steps already attempted.

Q47. Does physical damage automatically mean warranty coverage? A. No. Physical damage is excluded from warranty coverage.

Q48. Does a hardware malfunction qualify for warranty? A. Hardware malfunction is listed as a covered warranty condition, subject to the warranty process.

Q49. Does a component failure qualify for warranty? A. Component failure is listed as a covered warranty condition, subject to applicable verification.

Q50. Can support answer questions outside the Contoso knowledge base? A. Support is intended for Contoso Devices products, shipping, returns, refunds, warranty, troubleshooting, and account management.

Detailed Customer Scenarios and Decision Examples

The following examples illustrate how the knowledge base should be applied to different customer wording. The examples intentionally use varied language so retrieval systems can connect related requests to the correct policy.

Returns wording example

Question: Can I send the item back? Answer: Products may be returned within 30 days of delivery, subject to the return conditions.

Recommended support approach: identify the customer's intent, locate the applicable documented rule, state only what the knowledge base supports, and provide the next appropriate action. If eligibility cannot be established from the available information, request the relevant details or direct the customer to support review rather than inventing an exception.

Warranty wording example

Question: My device stopped working normally. Is it covered? Answer: A hardware malfunction may qualify for warranty review, subject to verification and exclusions.

Recommended support approach: identify the customer's intent, locate the applicable documented rule, state only what the knowledge base supports, and provide the next appropriate action. If eligibility cannot be established from the available information, request the relevant details or direct the customer to support review rather than inventing an exception.

Damage wording example

Question: I dropped my device. Is that a warranty claim? Answer: Accidental drops and physical damage are excluded from warranty coverage.

Recommended support approach: identify the customer's intent, locate the applicable documented rule, state only what the knowledge base supports, and provide the next appropriate action. If eligibility cannot be established from the available information, request the relevant details or direct the customer to support review rather than inventing an exception.

Shipping wording example

Question: Tracking says delivered but I have nothing. What now? Answer: Check the delivery location and relevant reception areas, then contact support if the package remains missing.

Recommended support approach: identify the customer's intent, locate the applicable documented rule, state only what the knowledge base supports, and provide the next appropriate action. If eligibility cannot be established from the available information, request the relevant details or direct the customer to support review rather than inventing an exception.

Troubleshooting wording example

Question: My voice assistant stopped responding. Answer: Check internet connectivity, update firmware, and restart the device.

Recommended support approach: identify the customer's intent, locate the applicable documented rule, state only what the knowledge base supports, and provide the next appropriate action. If eligibility cannot be established from the available information, request the relevant details or direct the customer to support review rather than inventing an exception.

Account wording example

Question: I cannot remember my password. Answer: Use the official password-reset process and follow verification instructions.

Recommended support approach: identify the customer's intent, locate the applicable documented rule, state only what the knowledge base supports, and provide the next appropriate action. If eligibility cannot be established from the available information, request the relevant details or direct the customer to support review rather than inventing an exception.

Knowledge Retrieval Reference

Customer questions may use different terms from the policy. For example, a customer may say that an item is broken, faulty, damaged, defective, or not working. The support process should distinguish the underlying condition rather than relying on a single keyword.

A return question should be evaluated against the return period, product condition, reason for return, and applicable exclusions. A warranty question should be evaluated against warranty duration, covered conditions, and exclusions.

A shipping question should be evaluated against order processing, carrier tracking, delivery status, address information, and shipment condition. A troubleshooting question should be evaluated against the specific symptom and the documented diagnostic procedure.

When the knowledge base does not contain sufficient information to answer a question, the system should not manufacture an answer. It should clearly state that the available customer-support knowledge base does not contain sufficient information.

Source citations should identify the document, page, relevance, and retrieved text needed to explain the answer. Internal prompts, credentials, environment variables, and unrelated system information should never be exposed through citations.

Support Interpretation Example 1

Example 1: A customer uses informal language to describe a frequently asked questions issue. The correct response should map the customer's description to the closest documented policy or procedure, avoid unsupported assumptions, and identify the relevant next step. If the available documentation is insufficient, the response should stop at the knowledge-base limitation instead of supplying unrelated general knowledge.

Support Interpretation Example 2

Example 2: A customer uses informal language to describe a frequently asked questions issue. The correct response should map the customer's description to the closest documented policy or procedure, avoid unsupported assumptions, and identify the relevant next step. If the available documentation is insufficient, the response should stop at the knowledge-base limitation instead of supplying unrelated general knowledge.

Support Interpretation Example 3

Example 3: A customer uses informal language to describe a frequently asked questions issue. The correct response should map the customer's description to the closest documented policy or procedure, avoid unsupported assumptions, and identify the relevant next step. If the available documentation is insufficient, the response should stop at the knowledge-base limitation instead of supplying unrelated general knowledge.

Support Interpretation Example 4

Example 4: A customer uses informal language to describe a frequently asked questions issue. The correct response should map the customer's description to the closest documented policy or procedure, avoid unsupported assumptions, and identify the relevant next step. If the available documentation is insufficient, the response should stop at the knowledge-base limitation instead of supplying unrelated general knowledge.

Support Interpretation Example 5

Example 5: A customer uses informal language to describe a frequently asked questions issue. The correct response should map the customer's description to the closest documented policy or procedure, avoid unsupported assumptions, and identify the relevant next step. If the available documentation is insufficient, the response should stop at the knowledge-base limitation instead of supplying unrelated general knowledge.

Support Interpretation Example 6

Example 6: A customer uses informal language to describe a frequently asked questions issue. The correct response should map the customer's description to the closest documented policy or procedure, avoid unsupported assumptions, and identify the relevant next step. If the available documentation is insufficient, the response should stop at the knowledge-base limitation instead of supplying unrelated general knowledge.
